## O.M.B. NO. 3067-0077 Expires May 31, 1996

ELEVATION CERTIFICATE

# FEDERAL EMERGENCY MANAGEMENT AGENCY NATIONAL FLOOD INSURANCE PROGRAM

ATTENTION: Use of this certificate does not provide a waiver of the flood insurance purchase requirement. This form is used only to provide elevation information necessary to ensure compliance with applicable community floodplain management ordinances, to determine the proper insurance premium rate, and/or to support a request for a Letter of Map Amendment or Revision (LOMA or LOMR).

Instructions for completing this form can be found on the following pages.

4. Elevation reference mark used appears on FIRM: 🔲 Yes 🖳 Yo (See Instructions on Page 4) 3. Indicate the elevation datum system used in determining the above reference level elevations: LyNGVD '29 🔲 Other (describe 1. Using the Elevation Certificate Instructions, indicate the diagram number from the diagrams found on Pages 5 and 6 that best 7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFE): NGVD '29 Yother (describe on back) Provide the following from the proper FIRM (See Instructions): (c). FIRM Zone A (without BFE). The floor used as the reference level from the selected diagram is | | | | | feet above | or OTHER DESCRIPTION (Lot and Block Numbers, etc.) (d). FIRM Zone AO. The floor used as the reference level from the selected diagram is LLLL feet above C or below C (check (b). FIRM Zones V1-V30, VE, and V (with BFE). The bottom of the lowest horizontal structural member of the reference level from STREET ADDRESS (Including Apt., Unit, Suite and/or Bldg, Number) OR P.O. ROUTE AND BOX NUMBER (NOTE: Use of construction drawings is only valid if the building does not yet have the reference level floor in place, in which case this certificate will only be valid for the building during the course of construction. A post-construction Elevation Certificate BUILDING OWNER'S NAME The reference level elevation is based on: X actual construction Construction drawings the FIRM [see Section B, Item 7], then convert the elevations to the datum system used on the FIRM and show the conversion under Comments on Page 2). (NOTE: If the elevation datum used in measuring the elevations is different than that used on For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate equation under Comments on Page 2.) the community's BFE: 350002 of 4755.0 feet NGVD (or other FIRM datum-see Section B, Item 7). one) the highest grade adjacent to the building. If no flood depth number is available, is the building's lowest floor (reference below [ ] (check one) the highest grade adjacent to the building. the selected diagram, is at an elevation of L 1. 6. The elevation of the lowest grade immediately adjacent to the building is: 4155.0 feet NGVD (or other FIRM datum-see

SECTION D COMMUNITY INFORMATION

will be required once construction is complete.)

### SECTION E CERTIFICATION

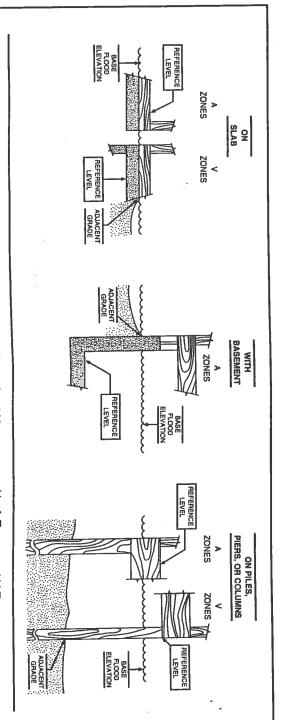

This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1–A30, AE, AH, A (with BFE), V1–V30,VE, and V (with BFE) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner's representative may also sign the certification.

Reference level diagrams 6, 7 and 8 - Distinguishing Features-If the certifier is unable to certify to breakaway/non-breakaway wall, enclosure size, location of servicing equipment, area use, wall openings, or unfinished area Feature(s), then list the Feature(s) not included in the certification under Comments below. The diagram number, Section C, Item 1, must still be entered.

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

### 45-BUILT F.F. 4955.83 42498

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones. Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.
